

LOSS PREVENTION SOLUTION FOR RETAIL

Bikal solutions for retailers aim to reduce stock losses whilst providing security for employees.

Retailers always have the on-going battle regarding losses born about from shop theft. Often mistakes are made when security options are chosen. The new Bikal Loss Prevention Solution combines CCTV with POS information from Point of Sale terminals to enhance through the use of CCTV evidence gathering. The objective is to deal with various scams like:

- Sweet heartening (employees under pricing items for their friends)
- Shop lifting
- Refunds proof (thieves using discarded receipts to claim refunds on items)
- Object tracking (system will alert if demo products are not returned to shelf in a specified time)

Bikal Loss Prevention System :

- Can Integrate with the majority of commercially available POS systems
- Bikal can provide a POS system through a partnership with RSTepos
- Video capture, analytics and networking upgrades can be included in line with application enhancements
- The Bikal solution is flexible so it can take into account differing business variants to make it bespoke for your operation, general retail applications like:
 - Supermarket
 - High end luxury stores (large and small items)
 - Clothing / department stores

- POS overlay
- Megapixel cameras for face capture
- Alert settings
- Scheduled recording
- Manage the camera with shop floor/ CCTV map (Emaps)

- Remote connection allows multi site management from HQ
- Integrate access control (ideal for stock room)
